Project Name	Pattern Sense: Classifying Fabric Patterns Using Deep Learning
Maximum Marks	4

Data flow:

1. Data Flow Overview

Component	Description
User Input	User uploads fabric image via mobile/web interface
Processing Step 1	Image is passed to the deep learning classification model
Processing Step 2	Model predicts pattern class (e.g., floral, geometric, plain)
Output	Classified pattern displayed to the user
Storage	Result is stored in database for future reference/history

2. User Stories Table
